

Templeton Global Fund

Class A (acc) USD • ISIN LU0128525929 • A sub-fund of Franklin Templeton Investment Funds
The management company is Franklin Templeton International Services S.à r.l.

Objectives and Investment Policy

Templeton Global Fund (the “Fund”) is classified as Article 8 under EU Sustainable Finance Disclosure Regulation and aims to increase the value of its investments over the medium to long term.

The Fund pursues an actively managed investment strategy and invests mainly in:

- equity securities issued by companies of any size located in any country, including emerging markets

The Fund can invest to a lesser extent in:

- derivatives for hedging, efficient portfolio management and investment purposes

The investment team uses in-depth analysis to select individual equity securities that it believes are undervalued and will provide the best opportunities for increased value over the long term.

The investment team employs a binding proprietary Environmental, Social and Governance (ESG) methodology which is applied to all the equity holdings of the Fund (except for derivatives, ancillary liquid assets, bank deposits, money market instruments and money market funds) to determine a company's profile on relevant environmental, social, and governance issues. Furthermore, the Fund excludes from its portfolio issuers that score in the bottom 20% of the Fund's Investment Universe based on ESG Score using the MSCI ESG Ratings Methodology. The Fund also applies specific exclusions and will not invest in companies that repeatedly and/or seriously violate the United Nations Global Compact Principles, manufacture nuclear or controversial weapons, derive certain thresholds of their revues from tobacco/tobacco products or from coal, oil sands extraction or coal-based

power generation. The weighted average base ESG score of the Fund's portfolio is higher than the average ESG score of the companies in the Fund's Investment Universe, as measured by the ESG Score using the MSCI ESG Ratings Methodology.

Benchmarks: MSCI All Country World Index-NR (used for performance comparison purposes - neither used as a constraint on how the Fund's portfolio is to be constructed nor set as a target for the Fund's performance to beat) and MSCI ACWI Investable Market Index-NR (used as a proxy for the universe, for the purpose of the ESG rating comparison). The Fund is not obliged to hold any of the benchmarks constituents and may significantly depart from the composition of these benchmarks.

You may request the sale of your shares on any Dealing Day (as defined in the current prospectus of the Fund).

The income received from the Fund's investments is accumulated with the result of increasing the value of the shares.

For further information on the Objectives and Investment Policy of the Fund, please refer to the section “Fund Information, Objectives and Investment Policies” of the current prospectus of Franklin Templeton Investment Funds.

Terms to Understand

Emerging markets: Countries whose economy, stock market, political situation and regulatory framework are not fully developed.

Equity securities: Securities that represent an ownership stake in a company.

Risk and Reward Profile

What does this indicator mean and what are its limits?

This indicator is designed to provide you with a measure of the price movement of this share class based on historical behavior.

Historical data may not be a reliable indication of the future risk profile of the Fund. The category shown is not guaranteed to remain unchanged and may shift over time.

The lowest category does not mean risk free.

Why is the Fund in this specific category?

The Fund invests mainly in equity securities of companies around the world.

Such securities have historically been subject to significant price movements that may occur suddenly due to market or company-specific factors. As a result, the performance of the Fund can fluctuate significantly over relatively short time periods.

Risks materially relevant not adequately captured by the indicator:

Emerging markets risk: the risk related to investing in countries that have less developed political, economic, legal and regulatory systems, and that may be impacted by political/economic instability, lack of liquidity or transparency, or safekeeping issues.

Foreign Currency risk: the risk of loss arising from exchange-rate fluctuations or due to exchange control regulations.

Liquidity risk: the risk that arises when adverse market conditions affect the ability to sell assets when necessary. Such risk may be triggered by (but not limited to) unexpected events such as environmental disasters or pandemics. Reduced liquidity may have a negative impact on the price of the assets.

For a full discussion of all the risks applicable to this Fund, please refer to the “Risk Considerations” section of the current prospectus of Franklin Templeton Investment Funds.
