

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

UBS (Lux) Equity Fund - European Opportunity Sustainable (EUR), class P-acc (ISIN: LU0006391097), EUR
 a sub-fund of UBS (Lux) Equity Fund

This sub-fund is managed by UBS Fund Management (Luxembourg) S.A (the Fund Management Company).

Objectives and investment policy

The actively managed investment fund invests mainly in equities of European companies. The portfolio focuses primarily on large companies, strategically supplemented by small and medium-sized companies, while the liquidity portion is very flexible and derivative instruments may also be used. This sub-fund promotes environmental and/or social characteristics but does not pursue a sustainable investment objective.

Based on thorough company screening, taking into account sustainability/ESG criteria, the fund manager combines carefully selected equities of various companies from different countries and sectors with the objective of taking advantage of interesting opportunities while controlling risk. The investment fund will exclude companies or industries whose products or business activities have a negative social or ecological impact. UBS Asset Management categorises this investment fund as a "Sustainability Focus" fund, which promotes environmental, social and corporate governance characteristics.

The portfolio manager has the discretion to construct the portfolio and is not bound by the benchmark in terms of equities and weighting. The investment fund uses the benchmark MSCI Europe (net div. reinv.) for portfolio composition, performance comparison, ESG profile management and risk management.

The return of the fund depends primarily on equity market development and their exchange rate fluctuations, as well as dividend payments.

In principle, investors may ask the Management Company to redeem their units on any business day in Luxembourg.

Income of this share class is reinvested.

The sub-fund may enter into securities lending transactions.

Risk and reward profile

More about the risk category

- The risk category is based on the estimated future volatility of the fund. The method used for this estimate depends on the fund type and historical data.
- Historical performance is not a reliable indicator for future performance.
- The risk category allocated is not static and may vary over time.
- Allocation to the lowest risk category does not mean that an investment in this fund is free of risk.

Why is the fund in this category?

- The fund is in risk category 6 because the volatility of its returns is very high. The fund invests in equities and may therefore be subject to high volatility. This requires an elevated risk tolerance and capacity. The value of a unit may fall below the purchase price.

Further material risks

- The fund may use derivatives, which can reduce or increase investment risk (including the risk of loss due to the bankruptcy of the counterparty).
- This fund pursues a very active management style. Its performance may therefore deviate considerably from that of a comparable market return.
- Every fund reveals specific risks, a detailed and comprehensive list of risk descriptions can be found in the prospectus.

Charges

The charges you pay are used to pay the costs of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry charge	5.00%
Exit charge	0.00%
Conversion fee	5.00%

This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.

Charges taken from the fund over a year

Ongoing charges	1.86%
-----------------	-------

Charges taken from the fund under certain specific conditions

Performance fee	none
-----------------	------

The **entry charge** shown is a maximum figure. In some cases you might pay less – you can find this out from your financial adviser.

The **ongoing charges** figure is based on the last twelve months prior to the preparation of this document. This figure may vary from year to year. It generally excludes:

- Securities lending related costs and portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling units in another collective investment undertaking.

For more information, please see the charges section of the fund's prospectus, which is available at www.ubs.com/funds.

Past performance

Historical performance is not a reliable indicator of future results.

The chart shows the class's investment returns calculated as a percentage change in the fund's net asset value from the end of one year to the end of the next. In general, the calculation of past performance takes account of all costs but not the issuing commission. If the fund is managed against a benchmark, its return is also shown.

The class was launched in 1990.

The past performance is calculated in EUR.

Where shown, the benchmark is a reference point to which the performance of a share class can be compared. The subfund does not intend to replicate the benchmark.

For share classes with "hedged" in their name, currency-hedged versions of the benchmark (or equivalent) may be used where available.

Practical information

Depository

UBS Europe SE, Luxembourg Branch

Further Information
